Healthier Hospitals
Compliant Products
The Herman Miller, Geiger, and Nemschoff products shown herein meet the requirements of Health Care Without Harm’s Healthy Interiors criteria, v2.3. Practice Greenhealth’s Healthy Interiors goal requires participating hospitals to ensure that 30 percent of the annual volume of furnishings and furniture purchases (based on cost) eliminate the use of formaldehyde, per and poly-fluorinated alkyl substances (PFAS), polyvinyl chloride (PVC), antimicrobials, and all flame retardants.

If a product shown herein includes one of the following icons, those exceptions must be considered when specifying product:

- **Curved-edge Surfaces**
  
  For laminate work surfaces you must specify straight-edge surfaces only.

- **Textiles**
  
  If your preferred Herman Miller or Geiger product shows the textile symbol, visit the Design for the Environment Textiles document for a full list of textiles that meet the Healthy Interiors goal of the Safer Chemicals Challenge. For Nemschoff products, please contact Nemschoff directly regarding textile treatments.

- **Antimicrobials Treatment**
  
  You must specify no antimicrobials treatment such as MicrobeCare™.

Furniture/fabric/products described herein meet Health Care Without Harm’s Healthy Interiors criteria according to the manufacturer. Health Care Without Harm and Practice Greenhealth do not verify this information.
