Healthier Hospitals encourages manufacturers to provide information on furniture and fabrics that meet Health Care Without Harm’s Healthy Interiors criteria. The furniture and fabrics listed herein comply with the criteria outlined in the Healthy Interiors Guidance Document according to KI and Pallas Textiles.

To make certain that your product selections meet the guidance, please refer to the last page of this document for details and clarification. Please note that individual customer choices may impact the overall product content as well.
## HEALTHIER HOSPITALS | OVERVIEW

TRAVERTINE
The goal of the Healthy Interiors Criteria, Version 2.1, is to eliminate the intentional use of formaldehyde, per- and poly-fluorinated alkyl substances (PFAS), polyvinyl chloride (PVC), antimicrobials, and all flame retardants. Details regarding the usage of these chemicals and treatments for KI and Pallas Textiles are described below.

1. FORMALDEHYDE

2. PER- AND POLY-FLUORINATED ALKYL SUBSTANCES (PFAS)

   Fabrics must not use water or stain-repellent treatments that contain compounds (avoid Nanotex, GreenShield, Alta, and other similar treatments). The product does not contain per- or poly-fluorinated alkyl substances as part of stain or water repellent treatments.

3. POLYVINYL CHLORIDE (PVC)

   Products must not contain PVC. To avoid PVC in tables, order 74P edging (plastic) or self-edging (laminate). To avoid PVC in seating, vinyl upholstery must be avoided. Components that constitute less than 1% of the product by weight are exempt.

4. ANTIMICROBIALS

   Fabrics must not be treated with an antimicrobial process (avoid BioAM Antimicrobial, Crypton, Incase, and other similar processes).

5. FLAME RETARDANTS

   Products and fabrics must not use any flame retardants. Customer’s own materials must follow the same guidelines.

Furniture and textiles described herein meet Health Care Without Harm’s Healthy Interiors criteria according to the manufacturer. Health Care Without Harm and Practice Greenhealth do not verify this information.
