The Health Care Climate Council is a leadership body of health systems committed to protecting their patients and employees from the health impacts of climate change and becoming anchors for resilient communities. Health Care Climate Council members implement innovative climate solutions, inspire and support others to act, and use their trusted voice and purchasing power to move policy and markets to drive the transformation to climate-smart health care.

19 members collectively represent:

- 500 hospitals
- 75 million patients served annually
- 1 million employees
- Over $215 billion in annual operating revenue
- 36 states

The Health Care Climate Council is coordinated by the global nonprofit Health Care Without Harm. Health Care Without Harm seeks to transform health care worldwide so the sector reduces its environmental footprint and becomes a leader in the global movement for environmental health and justice.
THE IMPACT

of the Health Care Climate Council

The Health Care Climate Council currently has 19 members representing the interests of 500 hospitals in 36 states.

These leaders are already generating or purchasing over 1 million MWh of renewable energy annually.

When met, collective carbon reduction goals will total nearly 3.6 million metric tons of CO₂e annually.

This is equivalent to taking over 760,000 passenger vehicles off the road every year.

This is equivalent to 125,000 home’s electricity use for one year.
