Ultradeather® | Fusion, Fusion Shimmer, Geom, Original, Pearlized, Pony, Tottori & Volar Bio
Ulratech® | Cove, Dwell, Eco Tech, Helix & Wired

What is Healthier Hospital

As part of the Safer Chemicals Challenge, Version 2, its Healthy Interiors Initiative includes the goal that 30 percent of the annual volume of furnishings and furniture purchases (based on cost) eliminate the use of five substances:

PVC • PFC stain resistant finishes • Flame retardants • Antimicrobials • Formaldehyde

Designers and Healthcare

Every day, patients, families and staff are exposed to a wide array of toxic chemicals in hospitals and healthcare facilities. Their impacts can be significant. Toxic chemicals are believed to play a role in rising chronic diseases and serious conditions. In response to this, hospitals and healthcare facilities across the country are procuring and installing furnishings to meet the goals of the Safer Chemicals Challenge.

Intended to spark creativity and influence project ideas, Ultradeathers strives to help designers be at the forefront of innovation.
Ultrafabrics and Healthcare

Hospitals are for healing. That is why it’s important for us to help provide patients, families and staff with a safe hospital environment.

In our ongoing effort to provide the design community with innovative and safe products, Ultrafabrics currently offers thirteen collections from our Ultraleather® and Ulratech® families:

We will continue to add offerings to this list for use in the healthcare sector without ever sacrificing performance, functionality or aesthetics.

* Fabrics described herein meet the Healthy Interiors goal of the Safer Chemicals Challenge according to the manufacturer. Practice Greenhealth does not verify this information. For more information please contact quality@ultrafabricsinc.com.
